Stocksbridge High School Redevelopment Plans

Stocksbridge High School development will be undertaken in 5 phases;

Phase Three - Refurbishment works to the Sports Hall.

Phase One – Demolition of part of the D block and the caretakers old house and the construction of a new 2 storey school block and the new caretakers house.

Phase Four – Demolition of the remaining D block and the construction of a new external multi use games area {MUGA}.

Phase Two – Extensive refurbishment works to the C Block.

Phase Five – Completion of the service yard and associated and external works.

Aerial from North

Our Progress So Far

Site set up and enablement has now been completed and the VINCI offices are up and running, these are the porta-cabins you can see from Shay House Lane.

We have temporary accommodation on the all weather pitch which accommodates the library, administration, careers,

geography, history, MFL, and ICT.

This has enabled us to start the demolition works. We have also moved the school's reception into temporary accommodation. This cabin should be the first point of contact for students of the school or parents/carers.

School and Community Liaison

VINCI Construction UK's Project Manager, Craig Pease and various members of the site team have recently held a 'Q&A' presentation on Health & Safety on Construction Sites to all Stocksbridge staff and all students in Years 7 to 11.

We are committed to working with the students and a programme will be developed for events to be held

with Stocksbridge School students through 2011-2012.

We will be producing newsletters, similar to this one, to keep you informed of any new events and updates on the site. A board will also be set up inside the school showing progress photographs and other updates from the site.

Facts and Figures

- Contact duration for this project is 117 weeks
- The contract value is £18million
- Throughout the contract VINCI Construction will be providing 8,000 square meters of floor space
- Project Completion will be December 2012.

Considerate Constructor

We are committed to the Considerate Constructors Scheme which monitors a project's interaction with its locality. We will engage with, consult and inform local residents regularly through a variety of forums.

Our on site Project Manager Craig Pease managed the construction of Yewlands School Technology College and was awarded **Silver** in 2009 and **Bronze** earlier this year. For the coming years that we are on site in Stocksbridge we are aiming for **GOLD**.

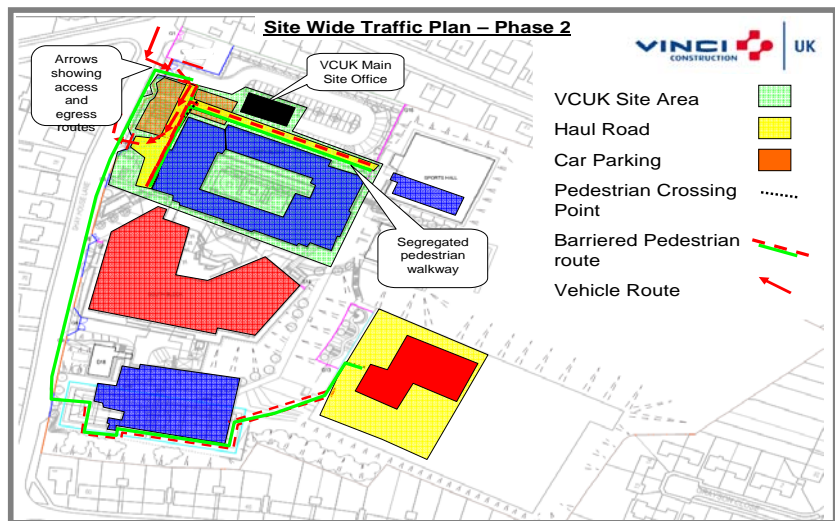

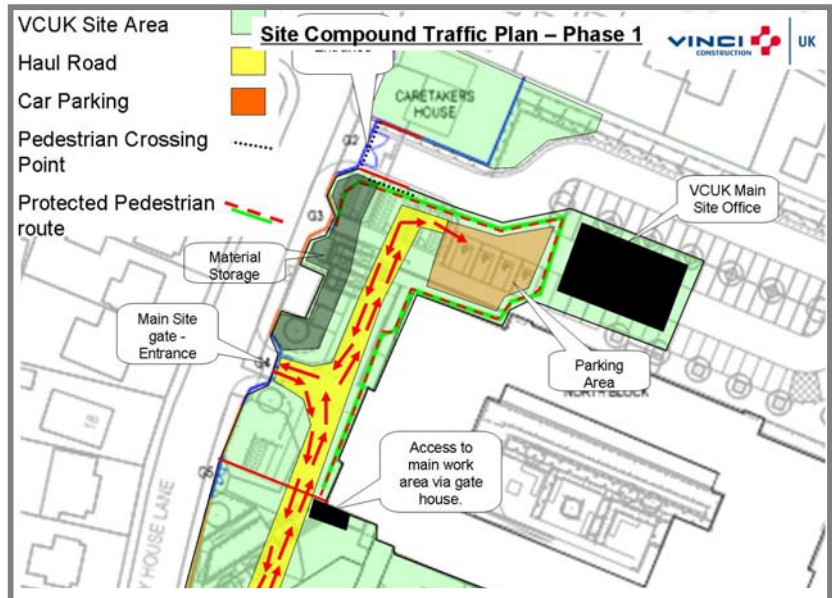

Safety

VINCI, as a contractor, is responsible for ensuring the construction area is safe. We will segregate our construction areas from all pupil areas.
